FreshBox — Case Study Briefing

Working Interview — Engagement Manager Presentation

20-minute presentation + 10-minute Q&A

About FreshBox

FreshBox is a UK-based direct-to-consumer meal kit subscription company delivering recipe boxes to ~80,000 active subscribers nationwide. The business operates three plan tiers — Classic (1-2 adults), Family (3-4 people) and Veggie (plant-based) — with weekly deliveries across Standard, Premium and Budget price points. Revenue is subscription-driven with a high proportion of introductory discount offers used to acquire new customers.

Recent History

FreshBox launched in London in 2019 and expanded to nationwide delivery in 2021 following a Series A raise. A Series B round in early 2024 funded an aggressive customer acquisition push, with heavy investment in paid social, influencer partnerships and introductory discount campaigns (typically 50-60% off the first four boxes). Subscriber volume grew rapidly through 2024-2025, reaching 80,000 active customers. However, the board is now scrutinising unit economics and has asked the executive team to present a data-driven retention strategy.

The Problem

Growth has masked a retention crisis. Approximately 65-70% of new subscribers cancel within the first six months — broadly in line with industry benchmarks for meal kit businesses, but commercially unsustainable at FreshBox's current scale. The business currently runs blanket discount campaigns to all at-risk customers, with no ability to distinguish between recoverable and unrecoverable churn. This erodes margin without measurable impact. The CFO has authorised an external engagement to explore a data-driven approach.

Key Financials

Subscribers: ~80,000 | Churn rate (6-month): 65-70% | Avg. order value: £45.37 | Avg. customer LTV: £400

Your Roles

Participant	Role in Session	Character Brief
Hannah	**CFO** (FreshBox)	You own the budget and the business case. The board has asked you to present a retention strategy by end of Q3. You're open to a data-driven approach but need to see clear ROI justification before committing.
Toju	**Head of Product & Retention** (FreshBox)	You own the retention workflow, CRM systems and customer lifecycle. You care about how the model integrates into your existing stack, what the output looks like for the retention team day-to-day and how you measure whether interventions are working.
Alex	**Engagement Manager** (QuantSpark)	Presenting a proposal for a 10-week churn prediction engagement across two phases: Prototype & Pilot (Weeks 1-6) and Scale & Embed (Weeks 7-10).
